

RADHIKA CHANDRASHEKHAR SABALE

Contact Information

Phone Number: +91 9075897590

Professional Email Address: radhika.1251130181@vit.edu

Address: Empire Estate , Mumbai-Pune road, Chinchwad Station, Pune.

LinkedIn Profile: www.linkedin.com/in/radhika-sabale

Career Objective / Summary

Curious and adaptable individual with a blend of analytical thinking and creativity. Interested in developing solutions that are both functional and engaging, while continuously exploring new ideas and improving skills.

Education Details

IT B-Tech

2025 – 2029 Vishwakarma Institute of Technology, Pune

SGPA – 9.4

HSC

2023 – 2024 Shri Mhalsakant Junior college, Akurdi, Pune

89.33%

SSC

2021 – 2022 Jnana Probodhini Navanagar Vidyalaya, Nigdi, Pune

97%

Skills

Technical Skills:

Programming

- C, C++, Python

Data / ML foundation

- NumPy, pandas, Basic SQL

Web

- HTML, CSS, JavaScript, Bootstrap, JQuery

Other

- Blender, 3D Max, Visual Basics, Adobe Flash, Photoshop, Corel draw, OOP in C++, Jupyter Notebook

Soft Skills:

1. Analytical Thinking & Problem-Solving
2. Self-Learning & Curiosity
3. Adaptability
4. Attention to Detail
5. Creativity
6. Persistence / Consistency
7. Observational Skills
8. Independent Work Ability as well as in Team

Projects

Project 1 Title: Knee Rehabilitation system using pose estimation

Technologies Used: Python, OpenCV, Numpy, Mediapipe, Matplotlib

Description: Developed a system to monitor and assist knee rehabilitation exercises using pose estimation techniques. Utilized computer vision to track body movements, analyze joint angles, and provide feedback for correct posture and exercise performance.

Project 2 Title: Gym posture monitoring system

Technologies Used: Arduino UNO kit, Arduino IDE

Description: Our project is a wearable smart injury-prevention system that monitors body posture, knee bending, and instability during gym exercises using sensors and Arduino. It provides real-time feedback through alerts to help users maintain correct form and reduce the risk of exercise-related injuries.

Project 3 Title: Fake News Detection system

Technologies Used: Jupyter Notebook, Python, Flask, HTML, CSS, JavaScript, Numpy, Pandas, Scikit-learn, NLTK, Matplotlib, Regex, seaborn

Description: Developed a model to analyze news data and predict authenticity using Linear Regression. Performed data preprocessing and feature extraction to convert text into numerical form, enabling the model to identify patterns and assist in classification.

Project 4 Title: Idea2market

Technologies Used: HTML, CSS, JavaScript, Python, MongoDB, MySQL.

Description: Idea2Market platform connects innovators with investors. Enable idea sharing, investment opportunities, and product development. Provides features like price estimation, feedback system, and smart search.

Project 5 Title: Heritage Website

Technologies Used: HTML, CSS, JavaScript, Bootstrap, JQuery

Description: Developed a responsive website showcasing the cultural and historical heritage of Pune. The platform provides detailed information about famous sites, including their history, location, and

significance. Designed user-friendly navigation and integrated basic web technologies (HTML, CSS, JavaScript) to enhance user experience.

Project 6 Title: Electricity bill generation

Technologies Used: C language

Description: Developed an application to automate electricity bill calculation based on user consumption data. The system efficiently calculates charges, generates bills, and maintains customer records. Implemented using basic programming concepts and ensured accuracy in billing and user-friendly operation.

Project 7 Title: Air quality index analysis

Technologies Used: Excel, PowerBI

Description: Analyzed air quality data to identify pollution trends and patterns using Excel and Power BI. Created interactive dashboards and visualizations to present insights and support data-driven decision-making.

Certifications

Infosys Springboard - Artificial Intelligence Foundation

Udemy - 100 days Python Bootcamp by Anjela Yu

Ekasutram X GFG – Setcode Coding Competetion Participation

ACM X ChaiCode – Online Hunt Participation

SESA Ideathon – Team Participation

Extracurricular Activities

ISA club - AI/ML coordinator

GedIT club – Game development volunteer

Hobbies

Playing Harmonium

Playing Piano

Creating Allegory or surrealism Paintings

Reading and Writing

Crocheting

Solving Cubes and puzzles
